SUMMARY

Frontend Developer with 1+ year of hands-on experience building 15+ live client websites using React, JavaScript, and WordPress. Skilled in delivering responsive, high-performance UI and handling end-to-end deployment. Currently transitioning toward modern frontend and full-stack (MERN) development.

SKILLS

- ❖ **Frontend:** HTML, CSS, JavaScript (ES6+), React, Tailwind
- ❖ **Backend (Basic):** Node.js, Express
- ❖ **Database:** MongoDB, SQL
- ❖ **Tools:** Git, GitHub, Vercel, npm
- ❖ **CMS:** WordPress, Elementor
- ❖ **Core Concepts:** Responsive Design, API Integration, State Management

EXPERIENCE

- ❖ **Web Developer | Webtactic**
Intern (Dec 2024 – Mar 2025) → Full-Time (Apr 2025 – Present)
 - Developed and maintained **15+ client websites** in production using WordPress and custom code
 - Customized themes and implemented client-specific features improving usability
 - Handled **deployment, hosting, and domain setup** for multiple projects
 - Integrated APIs and dynamic content for real-world business use cases
 - Collaborated directly with clients to gather requirements and deliver solutions

PROJECTS

- ❖ **Tasty Recipes | AI-Powered Recipe Web Application:** Built a full-stack web application using the MERN stack with a backend developed in Node.js and Express. Designed REST APIs to manage recipe data and user interactions, integrated MongoDB for data storage, and implemented features such as bookmarking and user-specific data handling. Focused on backend logic, API design, and deployment of the application.
